## TRIMLESS WITH INVISIBLE HINGES?

All made possible with EZY-JAMB. Many architects and designers across the country asked if we could use an invisible hinge with our door frame. After much research and testing we found a way to use them in our product. This has generated a great response and has made architectural dreams possible for many projects.

Some frequently asked questions about this product:

Q: Does the hinge come already installed in your frame?

A: No, it does not. EZY-JAMB comes mortised for the SOSS invisible hinges and all that you need to do is slide the hinge through the mortise in the frame and fasten it as shown in the installation instructions,

Q: Where do we get the hinges from?

A: STUDCO supplies the hinges along with our EZY-JAMB metal door frame.

Q: What finishes are available for the invisible hinges?

A: The following finishes are available: Polished Brass, Polished Chrome, Satin Brass, Satin Chrome, Satin Nickel, Polished Nickel & Stainless Steel.
