## EZY-JAMB STANDARD HINGES FOR 1-3/4" DOOR

These are Stainless steel ball bearing hinges made specially for the EZY-JAMB door frame. Since these hinges cannot be mortised into our door frame we have developed a high quality hinge that has been tested and proven successful.

### INSTALLATION

To install these hinges you simply use the hinge positioning chart on the next page and you use the driller screws that are provided to install the hinge.
